### **Botswana Representatives Visit Endless Summer Harvest**

This past Tuesday, Endless Summer Harvest in Purcellville, Virginia hosted international guests from Botswana, in Africa, on an educational tour of the hydroponic greenhouses. Endless Summer Harvest's hydroponic growing techniques are ideally suited to climates where excessive heat or water shortages create difficult growing conditions. The Botswana businessmen hope to introduce hydroponic farming to Botswana and create a new era of food security. Endless Summer Harvest offered to assist and provided other hydroponic industry and academic contact information to the Botswanans.

Endless Summer Harvest is a hydroponic farm growing gourmet lettuces and salad greens in 12,000 square feet of technologically advanced greenhouses in Purcellville, Virginia. We provide delicious, locally grown, pesticide-free produce, 365 days a year. For more information about Endless Summer Harvest, visit the website at [www.esharvest.com](http://www.esharvest.com)
